

WALL.ICE NORTH FACE ICE TOOL

with ice pick EA60E

Art.no.: EV30A-B

The north face is calling! And WALL.ICE is calling back. The angle of the shaft has been adapted to meet the challenges of alpine terrain. The head is inherited from the K.I.C.E.R., including the tried-and-tested adjustable ice pick, and achieves full compatibility regarding tube pick and hammer. The shaft passes into the grip, and can thus also be used as an ice axe anchor. A compact north face tool without any unnecessary weight.

use cases:

ice climbing, mountain sports

Technical specifications

shaft	Material: aluminium Color: azure Finish: anodized
head	Material: steel Color: black Finish: ktl coated
handle	Material: polymer Color: anthracite
Weight	599 g
Total length	50 cm
