COBRA® FM
ALUMINIUM

20 mm, standard clips
Art.no.: FM20KVV

COBRA® FM buckles are based on the patented COBRA® Quick Release locking system, which prevents accidental opening as well as opening under load.

Thanks to their robust yet lightweight construction, they are ideally suited as a technical design element for bags and belts. Their functionality and low weight also make them an excellent choice for use in sports gear and dog collars.

This version of the COBRA® FM is intended for 20 mm webbing width. The ergonomically shaped brass clips in our FM standard size facilitate opening the buckle. Thanks to the Tri-Glide-adjuster bar on both parts of the buckle, no stitching is needed. The webbing length can be adjusted individually.

Due to its lightweight design, the buckle is not intended for load-bearing applications (no PPE).

use cases:
equipment, Fashion, tactical
