COBRA® FM
ALUMINIUM

38 mm, XL clips
Art.no.: FM38KVF-XL

COBRA® FM buckles are based on the patented COBRA® Quick Release locking system, which prevents accidental opening as well as opening under load.

Thanks to their robust yet lightweight construction, they are ideally suited as a technical design element for bags and belts. Their functionality and low weight also make them an excellent choice for use in sports gear and dog collars.

This version of the COBRA® FM is intended for 38 mm webbing width. The ergonomically shaped brass clips in our FM-XL size facilitate opening the buckle. The length of the webbing can be adjusted quickly and individually at the male part of the buckle using the Tri-Glide adjustment bar.

Due to its lightweight design, the buckle is not intended for load-bearing applications (no PPE).

use cases:
equipment, Fashion, tactical
