COBRA® SPECIAL DESIGNS
SCREW-ON PLATE

9 mm holes
Art.no.: FY00K-AA001+L

The screw-on plate features a male connector that can pair with a COBRA® PRO STYLE female part, as well as two 9 mm holes for countersunk screws.

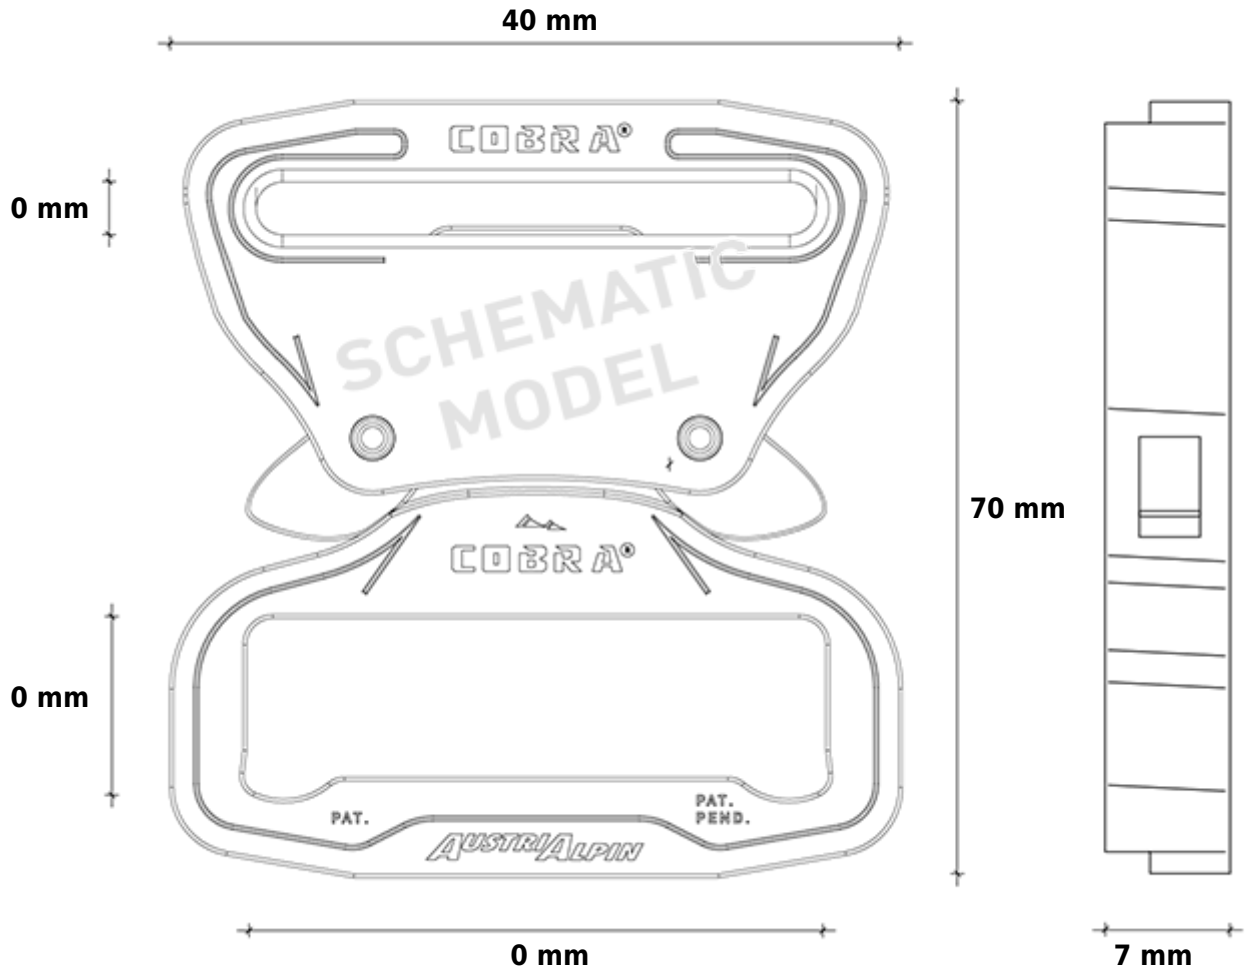

Its most common application is fixed screw mounting in emergency vehicles — from ambulances to armored vehicles. Equipment such as ventilators, defibrillators, and similar devices can be securely attached to the plate using the COBRA® PRO STYLE female body. They remain reliably in place even under high G-forces, yet are quickly accessible when needed.

use cases:
tactical, equipment
