COBRA® SPECIAL DESIGNS
PRO STYLE COMPACT

I Connector Plate, 12 mm slot
Art.no.: FY00K-I12+L

The I-piece is a plate with a slot and two male connectors that can pair with two COBRA® PRO STYLE female parts. It lets you quickly and securely connect straps coming from three sides. The I Connector Plate is a trusted component in paragliding harness buckles. It is also used for securing patients, loads, and bags.

T goes I: Compared to the T Connector plate, the new I Connector features a more compact design, and the 12 mm slot has been moved to the center. Especially when used in paragliding harnesses, its low-profile design without protruding parts increases wearing comfort by eliminating pressure points on the upper body.

Compatible exclusively with COBRA® PRO STYLE. In this configuration, we guarantee a breaking load of 18 kN in loop configuration and 10 kN under transverse loading.

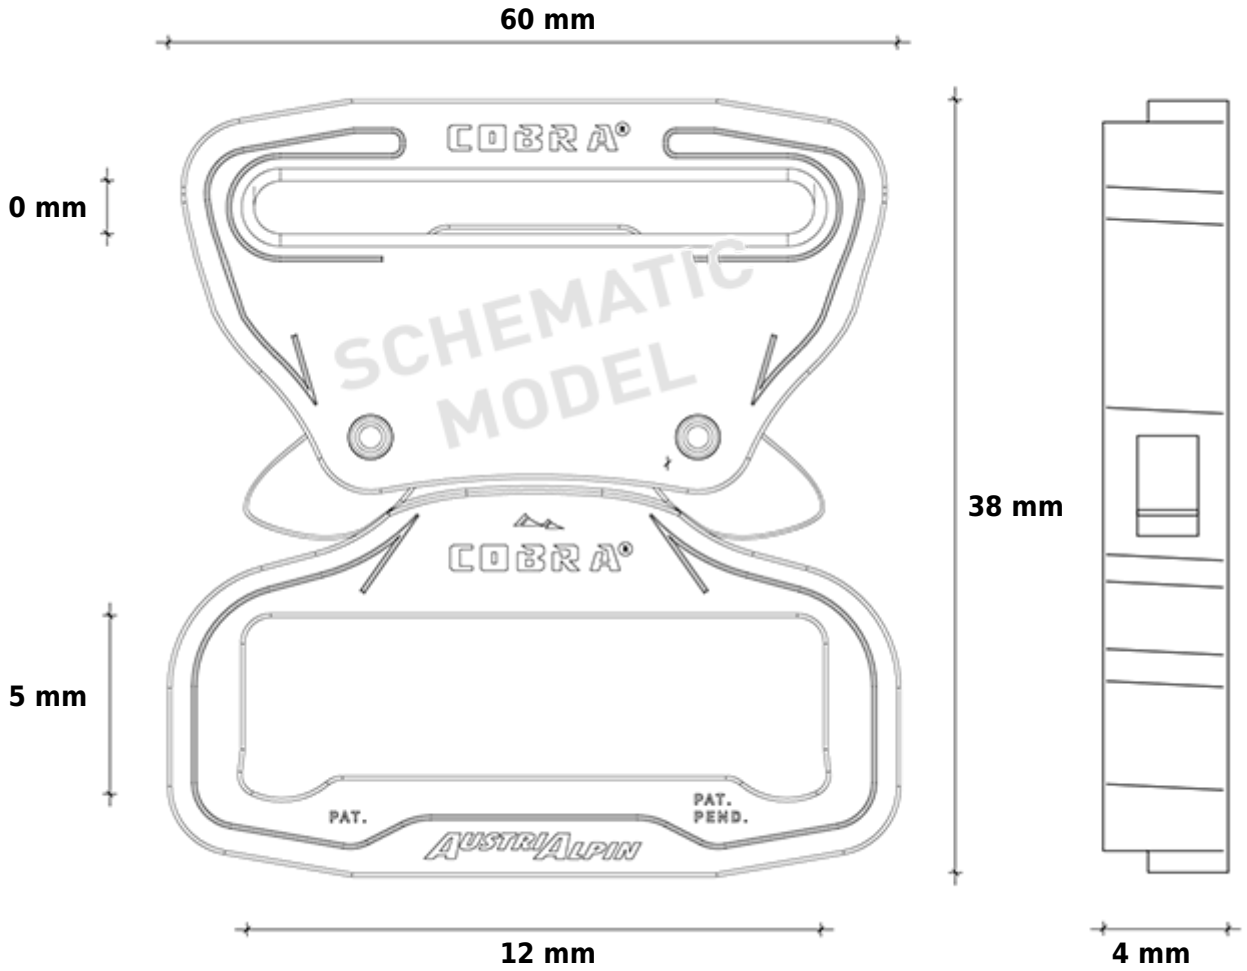

use cases:
equipment, Fashion, air sports, PPE, tactical

Technical specifications

BODY	**Material:** aluminium **Color:** black **Finish:** ktl-coated
