

TOP ANCHOR DEVICE CHAIN BELAY STAINLESS STEEL

bolt hanger vertical, bolt hanger horizontal, ring

Art.no.: HK41HH

Belay station consisting of two 10 mm bolt hangers, a chain, and an individually tested rappel ring for threading the rope. The recommended drill hole distance is 25-30 cm.

The horizontal alignment of the bolt hanger lets the ring hang freely. This makes it easy to rappel along the main axis and retrieve the rope smoothly. The risk of the rope jamming is significantly minimized.

This design enables flexible installation. The second, higher anchor point can be positioned to the left or right of the redirect. The entire set is made from stainless steel.

Manufacturer's instructions: Use only with stainless steel bolts. Thanks to the horizontally aligned lower bolt hanger, only a single ring is required for this redirect. Please note the latest UIAA release concerning stress corrosion in our knowledgebase.

use cases:

sports climbing, canyoning, equipment

Technical specifications

CHAIN	Material: stainless steel Color: colorless Finish: polished
HANGER	Material: stainless steel Color: colorless Finish: polished
DOUBLERING	Material: stainless steel Color: colorless Finish: polished
WEIGHT	440 g
TOTAL LENGTH	30 cm
COUNTRY OF ORIGIN	Austria
