

SP.ICE.R GUIDE

ICE AXE

52 cm, incl. Handrest, pick & spike protector
Art.no.: PG52SH-B

Versatile, ultralight ice axe for demanding alpine climbs and technical mountaineering

The SP.ICE.R GUIDE blends versatility with a carefully engineered design. Developed for demanding alpine climbs, technical mountaineering, and steep snow and ice faces, it delivers excellent performance for classic mountaineering. Its balanced design supports all classic ice axe techniques.

The ergonomically shaped head with a textured polymer insert sits comfortably in the hand and makes handling easy when carrying or quickly switching hands. The aggressive hardened-steel pick ensures precise placement and a secure hold in hard snow, ice, and rock.

A well-balanced shaft, made from high-strength aluminum, blends maximum stability with minimal weight. Grip grooves in the lower shaft provide a secure hold.

The SP.ICE.R GUIDE 520 comes standard with convenient pick and spike protectors and a tool-free adjustable handrest.

Features:

- 100% Made in Austria.
- Ergonomic head with a textured polymer insert.
- Precisely shaped pick for reliable performance in technical terrain.
- High-strength aluminum shaft with grip grooves.
- Integrated carabiner holes in the ice axe head and spike.

use cases:
mountain sports
