

## SKYSTEEP

### VARIABLE 11-POINT CRAMPONS

#### step-in binding

Art.no.: ST11B

Ready for new adventures? No matter if at your next glacier tour, in steep ice or when mixed or drytooling – the SKYSTEEP 11- or 12-point crampons with Step-In binding is your reliable and safe partner in every technically demanding terrain! Made of resilient steel, this crampon is a real quick-change artist. Because SKYSTEEP doesn't only have convertible front points in order to use it as a one-point or two point front: The additionally available SKYSTEEP tuning package makes it possible to change the crampons from a Step-In to a COMBI system – in this way you can easily wear the crampons also with partly crampon-compatible shoes. Our SKYSTEEP is size adjustable via its movable center bar and a snap-in feather. The bulbous shape of the anti-bot plates contributes to the removal of snow sticking to the shoe sole.

#### use cases:

ice climbing
