## **DYNA.MIT**CORD WITH DYNEEMA CORE

22 kN

Art.no.: ZS29RY-R

290 cm long, red cord with extra high breaking strength of 22 kN (single strand). Simplifying material handling while in the mountains.

- + 6 mm diameter cord with dyneema-core and polyester sheath combine for optimal performance of a sewn sling (universal functionality) and cord (can be knotted without difficulty).
- + The color concept blue, green, red, black simplifies material handling, organizes the belay, makes trading off material easy and clarifies the setup of rescue systems.
- + The adjusted lengths allow you to select what you want as quickly as possible (black: simple, red/grey: double, blue: triple).
- + The ends are sewn at 5 cm to minimize slipping of the sheath with respect to the smooth dyneema core, and to allow for the correct knot placement.

The carabiner shown in figure 2 is not included in the delivery.

## use cases:

mountain sports

## **Technical specifications**
